Will Make Third Community Exhibit

The Women's Institute will make undertakes to have a community exhibit at the Car-mungay fair this year, for the third time and with Mrs. Harper as convenor it is hoped to make a united effort to have the very best of everything for the occasion that can be produced in the district, prepared in the most attractive manner possible with particular attention to decorations. In a paper presented to the Institute Mrs. Harper made many recommendations with regard to doing which an attempt will be made to cover in a following issue of this paper. At the present time the suggestion that everyone keep this event in mind during planning time and endeavor to grow something good enough to be placed in the exhibit is perhaps one of the most essential of the points urged. Champion has been first and second in the past two years and those who have seen the exhibits may fully appreciate their value to the reputation of the district. While in charge of the Women's Institute the exhibit is a purely community effort, with an organization doing a big part of the work of assembling and preparing it, and as such, deserves the heartiest support of everyone residing in the vicinity.

An Easter dance is being put on at the Alston Community Hall on Monday, April 22nd. The Turner Valley Orchestra will supply the music and supper will be served in the basement at a cost of 25c per plate. A big crowd is anticipated.

As soon as the old straw stack bottoms throw out in the spring they should be scattered on the knolls and lights spots in your land and summer fallowed. They take up room in the fields, but add fibre to the soil when scattered and plowed under.—Ex.

Fresh strawberries, rhubarb, asparagus, tomatoes and cukes for your Easter dinner at Campbell's.

C. Lafontse has acquired 200 baby chicks as the beginning of stocking his poultry farm. Note his ad. elsewhere in this issue for pullets.

Alberta Leads In Homestead Entries

The rising tide of Peace River development is reflected by homestead entries. A tabulation checked by the Acting Commissioner of Lands, Department of the Interior, Ottawa, shows that in the calendar year of 1928, 60.8 per cent of all the homestead entries in the three Prairie Provinces were in Alberta and 55.8 per cent of the total was represented by filings in the three Northern Alberta agencies, viz., Edmonton, Grand Prairie and Peace River, while 34.1 per cent of the grand total was represented by filings in the two Peace River agencies, i.e., Grand Prairie and Peace River. The actual number of homestead entries and soldier grants filed in 1928 at the two Northern agencies was 5,321, as against 1,323 in 1927, being an increase of over 317 per cent from one year to the next. It should be explained that the two Peace River agencies comprehend the Peace River Block of British Columbia, which is thus included in the figures cited above.

Baby Clinic Thursday, May 1

The April meeting was held at the home of Mrs. W. A. Summers, and twelve members responded to the roll call by giving "Agricultural Hints." We are still trying to get a rest room for the benefit of out of town lady friends. It was learned that Dr. Heal cannot hold the dental clinic until he gets the chart forms from the government.

The Baby Clinic is to be held on the first of May at 10 a.m. at the home of Mrs. U. S. Alexander.

It was decided to hold a flower and vegetable show along the lines laid down last year, with the same committees in charge, i.e.

Flowers—Mesdames Stephenson, Day and Caldwell. Vegetables—Mesdames W. Ulrich, Woodhull and Alexander. Mrs. Bastin was appointed the Provincial Delegate to the Edmonton convention. Mrs. Chamberlain, the delegate to the Lethbridge district convention, read an exceptionally good report and also brought samples and souvenirs from the interesting places visited by the delegates, as the candy and macaroni factories. Mrs. Chamberlain also brought copies of all the resolutions passed. She also refunded about half of the money given her for expenses. It was decided that we donate \$5 to the fund for the portrait of Mrs. McKinney.

Mrs. O. Harper was unable to be present but sent her paper on Community fair work, which was read by the president, Mrs. Beaulieu who is to give us a ten minute talk at each meeting on the subject of legislation, will speak on the Mother's Allowance Act at the next meeting to be held at the teacherage.

Mrs. R. E. Baker then read some charming juvenile poems and then we adjourned and enjoyed a fine lunch provided by Mrs. Bastin and Mrs. Hummel, assisted by the hostess and Phyllis Chamberlain. Collection \$1.90

Secures Verdict Against Hospital

Judgment of \$20,233 against the Municipal District of Vulcan, was handed down by Mr. Justice Walsh in the Supreme Court of Alberta, Tuesday in the action brought against the district on behalf of two-year-old Eunice Stone, by her father, Glenn Stone, of Vulcan.

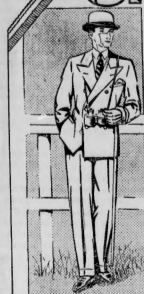

The plaintiff had sought to recover \$50,720 damages from the defendant for injuries sustained by the infant plaintiff while a patient at the municipal hospital at Vulcan. The plaintiff was awarded \$9,500 to the infant and \$1,000 to the father. This latter sum was reduced to \$750 by the court.

A six-man jury heard the case. The claim of the plaintiff was based on the fact that the infant plaintiff was injured on five separate occasions by boiling water while in the hospital. As the defendant municipality had admitted liability in the case, no evidence as to the manner in which the injuries were received was taken.

Evidence for the plaintiff was given Tuesday by Dr. W. Merritt, Dr. D. S. MacNab and Dr. E. G. Mason, while Dr. E. B. Bosch and Dr. J. W. Richardson testified for the defendant. The jury deliberated for three quarters of an hour.

A. L. Smith, K.C., A. A. Ballachee, High River, and F. L. Burnett, appeared for the plaintiff; and A. Macleod Sinclair, K.C., and H. G. Mayer acted for the defendant in the action.—Alberta.

Leishman Clothes

NOTES AND COMMENT.

The copious moisture provided by the rain and snow which fell from Monday morning until Tuesday night appears to have been practically general all over the west. While seedling operations were held up abruptly there was no disposition to find fault with the weather man. Estimates of the acreage sown in this vicinity varied from 35 to 50 per cent of the whole. Opinions vary as to whether the wheat sown before the precipitation or after it will be the best at harvest time, but all are satisfied that prospects have been wonderfully improved by the splendid rainfall.

Down east they are talking about a Dominion election, supposed to be held in July or slightly later, and comments would indicate that a real contest is expected with the result a doubtful matter. The present situation in the house of commons could be changed easily from a Liberal and Progressive majority to a minority, and only slight gains for the Conservatives scattered over the country would be necessary. In Alberta the price of wheat is the main topic of discussion and very little interest is being taken in the political situation.

The Alberta Motor Association has in view a map of the Sunshine Trail, Salt Lake City to Athabasca and is asking the towns en route to contribute \$10.00 each to the cost. According to their statement favorable replies to the suggestion have been received from all but a very few of the points concerned, Champion being one of the latter. It is hoped to increase travel on this trail to a considerable extent by the publication of this map and the Association is contributing \$250 of the amount required and is asking 25 towns to make up the balance of \$500, the cost of the map. There would appear to be cause to consider this proposition favorably.

Rust Control
By New Method

(Experimental Farms Note)

Investigations carried on by the Dominion Rust Research Laboratory, Winnipeg, in co-operation with the Dominion Laboratory of Plant Pathology, Saskatoon, have shown that rust is spread in Western Canada by means of spores carried by the wind and that these spores are found to a height of a mile or more overhead. Moreover, there is very convincing evidence that the earliest infections to appear in western Canada arise from spores that have been carried in by winds from rust-infected areas further south. Obviously then it is impossible to build a barrier or impose any quarantine measure for their exclusion. There are, however, two poss-

ible methods of controlling rust, and the Dominion Rust Laboratory, of the experimental farms branch, has done a good deal of work on both. One of these is by applying some toxic substance to the plants which will adhere to them for a considerable length of time, so that, when the rust spores alight on the plants and germinate, they come into contact with the substance and are killed. Finely powdered sulphur has been found to give very effective control. The cost of the treatment is between \$4 and \$8 per acre. Quite satisfactory hand-dusters are available for treating small-sized plots, and several manufacturers have made considerable progress in developing a type of machine suitable for large acreages. The other method is by breeding rust-resistant varieties of commercially desirable wheats, or other cereals. By the plant breeding method, it has been possible to transfer a high degree of resistance, amounting practically to immunity, to a number of very promising strains of wheat. In milling qualities all of these are equal to Marquis and several of them are superior. Breeding for rust resistance in oats is progressing, and the prospects of developing strains of oats highly resistant to the most prevalent physiologic forms of oat stem rust are hopeful. On the other hand, no oat variety has been found

which possesses any marked resistance to the most prevalent physiologic form of crown rust of oats. To control this rust, wheat must be made to sulphur dusting and the eradication of the buckthorn, a shrub which serves to propagate this rust.

Call the Cat

Well, the dogs have rabies, rabbits have tularemia, parrots have just revealed that they have psittacosis, and we'll bet a nickel that the gold fish or canaries will be to blame yet for halitosis.

Reasonable Doubt

The jury had acquitted the defendant of horse-stealing because of the powerful plea of his lawyer.

"Honor bright, now, bill," said the lawyer, as the two left the court house, "you did steal that horse, didn't you?"

"Well, now look here, I'll be honest with you. I always did think I stole that horse until I heard you make the speech to the jury. Now I'll be dogged if I didn't get my doubts about it."

Which First?

"Above all," said the mistress to the new maid, "I want obedience, and timidity." "Yes, madam," replied the girl. "And if anybody calls when you are in, and you say you are out, which shall come first—obedience or timidity?"

The roads are drying rapidly after the rain but they will be decidedly rough until dragging operations are under way.

Practice Of Inoculating Seed Of Various Legumes Has Been Found To Be Beneficial

During the past few years practically all Ontario farmers have come to recognize the value of inoculating the seed of various legumes when they are being grown on land which has not previously been used to these crops or on land where their cultivation has been for a period of years. This practice has proven a good one and is now used in every progressive agricultural country of the world but the discovery of a proper method of getting the inoculation or culture to the farmer was not done in a day and the history is rather interesting.

The first efforts in this direction were made in Germany where samples of the soil which had been used for growing the legumes was transported to the virgin soil and there spread around to insure the presence of the bacteria. The disadvantages of this method were obvious and a commercial company sold a large number of prepared cultures which were found to be valuable. Agricultural colleges and experiment stations in the various countries worked on the problem for a number of years; at one time the Department of Agriculture believed they had a successful method of growing and sending out the bacterial cultures, but it proved a failure.

It remained for the Department of Bacteriology at the O.A.C. to devise the proper method and the culture advised was soon adopted as the one best suited for the work. The familiar bottle, half filled with a white substance is the outgrowth of this discovery and the bacteria on this culture will live almost indefinitely. Each legume has its own particular culture and the one that is supplied for alfalfa is of no value for inoculating red clover and vice versa. Since the discovery of this discovery and the bacteria on this culture will live almost indefinitely. Each legume has its own particular culture and the one that is supplied for alfalfa is of no value for inoculating red clover and vice versa.

A question frequently asked is, when is inoculation required and for what crops? The crops requiring inoculation are alfalfa, red clover, sweet clover, peas, field beans and soy beans. Inoculation should be practiced where the crop is to be grown on soil that has never before produced that particular crop and in general if it has not produced a good yield of the said crop within the past four or five years.

The Department has not claimed infallible increases after the use of the inoculant, it has been generally assumed that in about seventy cases out of every hundred there will be a substantial increase and reports have shown that in the case of the other thirty per cent, the bacteria were probably already in the soil and inoculation thus rendered unnecessary.

It is interesting to note that rich soils which are very high in nitrogen will often produce good crops of legumes for the first time without inoculation. The reason for this is that the bacteria used in inoculating have as their function the converting of the nitrogen in the air into a form which the plants can use and in nitrogen rich soils the soil nitrogen is used when the bacteria are absent, thus seriously depleting the soil but not giving any noticeable effect on the plant.

"Mother, isn't your hair permanently wavy?"
"My dear, what makes you ask such a thing?"
"I've been thinking. Why can't I have my neck permanently wavy?"

A Dutch scientist proposed to attempt to create rain by taking kung-titles of pulverized ice above the clouds in aeroplanes and letting it drop.

"I sent a letter to have my character told from my handwriting."
"What was the result?"
"Your letter pointed that spelling is not your strong point," for thus Humor, Madrid.

It is typically sports! A charming wearable tunic that adapts itself to all the season's new fashions. Several dresses may be made from this 284 No. 284 and each one appears entirely different. It is sketched in wool jersey in chausseur green, with dash of soft blue and white. Neckline and cuffs are finished with smart finish to become collarless. Pattern price, 38, 40 and 42 inches bust. Orange-tinted or violet blue silk crepe is effective to complete ensemble. Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

New Grain Act

New Act Is a Consolidation and Revision Of The Old Measure
Canada's new grain act was up for consideration by the committee of the House of Commons on agriculture and colonization. This new act is a consolidation and revision of the old measure but involves no change in the operation of the legislation except on minor points.

Col. C. M. Biggar, K.C., who drafted the new act explained the chief difficulty with the old act was that the sections were badly arranged and occasionally inconsistent. With regard to some provisions there was doubt as to their constitutional validity, he said.

In drafting the new act, Col. Biggar stated, it was necessary to find new constitutional bases for some sections in order to ensure their validity. The sections are arranged differently and simplified, he declared.

Clover a Honey Maker

Figures Show It Leads As Source Of Nectar

Clover and honey have always been intimately associated and with good reason. Figures supplied by the Dominion Experimental Stations of the Dominion Department of Agriculture show that clover leads as a source of nectar supplying the honey flow during the year for 40 days; fruit blossoms supply nectar 26 days of the year, the dandelion for 23 days, the raspberry and goldenrod each for 20 days, with pussy willow starting the season with a 15 day supply.

Modern Poultry Research International Standardization Of Poultry Industry At London Congress

The poultry industry, perhaps more than any other, is becoming standardized in a universal sense through the instrumentality of the World's Poultry Science Association. This organization will this year bring together at the World's Poultry Congress, seriously minded men and women from many countries who are concerned with the development of the poultry industry and incidentally with the promoting of international friendship.

The fourth congress which takes place at the Crystal Palace, in Old London, England, in July this year, promises to exceed any of the previous ones. At that meeting there will be pooled the best and most recent knowledge concerning the various aspects of the poultry industry in all parts of the world. Modern poultry research, education and economics will be revealed through papers and discussions and national exhibits from half a hundred countries.

Displays, on an international basis, of purebred poultry will bring out the best that has been achieved in poultry improvement. Commercial exhibits at that great show will reveal what the trade has accomplished in providing the requirements of the poultry industry and of carrying it on in a profitable way.

Peasants Exempted From Farm Taxation

Soviets Will Try To Encourage Them To Stay On Land

A number of important exemptions for peasants on collective farms have been decided upon by the Communist party. The object is to encourage peasants to stay on such farms and also to promote the growth of these institutions. The exemptions include the following: Freedom from taxation for two years on all cattle and horses. An extension of a credit of \$250,000,000 to promote collective farm organization.

Postponement of all outstanding debts of collective farmers until the end of the harvest season.

Reduction of the total agricultural tax for the fiscal year 1930-31.

Serious Problem For Cattle Committees

Herdsmen Said To Be Resorting To Knife And Needle For Show Ring Purposes

The Farmers' Advocate says: Cattle committees who outline the policy and lay down the rules which govern exhibitions in Canada are giving earnest thought and consideration to the serious problem of detecting and harrising "doctored" cattle. The large exhibitors, both East and West, realize that something must be done to prevent the public being misled by super-except herdsmen who are able to use knife and needle in beautifying their cattle. It is a practice that cannot be detected by the public and the fair boards are acting wisely in their attempt to ban the doctored animal and the exhibitor who offers such animals for competition.

One suggestion is that all cattle be inspected by a veterinarian before entering the ring. This entails much unnecessary work, and any animal found tampered with would simply be led back into the stable to be presented at future shows or exhibitions held elsewhere. It becomes necessary to inspect only a few cattle, the champions and reserve champions, and the fear of exposure after winning such honors would deter any exhibitor from going to undue lengths in treating or preparing animals for the show ring. It is not the cattle that win three, four or fifth place in a class, or even the prize money altogether, which a fair board needs to worry. Not one in a hundred of them receive more than ordinary fitting.

It is the cattle that are winning high honors in the show-rings of Canada and the United States that need watching. Neither do we wish to imply that all cattle that win championships are dishonestly fitted or treated. Many breeders and exhibitors would condemn so such practice; but it is known that herdsmen are resorting to the knife and the needle, and fair boards cannot overlook the fact.

Would Curtail Production

Effort Made To Reduce Spring Wheat Planting In United States

Two United States government preachers of the gospel of curtailed production as the only real salvation of wheat farmers made ready for Chicago to speed over the great spring wheat area of the northwest in a last-minute effort to forestall the planting of wheat on at least 2,000,000 acres.

The two men were Dr. John L. Outler, chief economist of the tariff commission, and James Howard, federal farm board representative and former president of the National Farm Bureau Federation.

Their final plans for the intensive campaign by which they hope to reduce spring wheat acreage by 10 per cent, were made in conference recently with Alexander Legge, president of the Farm Board.

THE TAKU GLACIER

This ice field, one of the largest in the world, is one of the many wonders which are to be seen on the route of the Canadian National Steamships between Vancouver and Skagway, Alaska. All of the three boats in this service, the "Prince George," "Prince Rupert," and the new "Prince Henry," pass within a stone's throw of this glacier. The height of which can be judged by the fishing smack in the foreground. The glacier is 90 miles long and only about one-quarter of its width is shown in the photograph.

State Of Canadian Business Is Fair In Comparison With Conditions In Other Countries

Delegation To Investigate Modern Farm Machinery

Men From Britain Visiting Canada and United States

Commissioned by the British Government to spend some weeks in both British and Canada to investigate modern farm machinery and labor-saving devices on the farm, J. E. Newman, of the Institute of Agricultural Engineering, Oxford University; Thomas Baxter, ex-president of the National Farmers' Union of England; and G. Charles, representing labor organizations, were in Montreal, recently, on their way to Ottawa. The delegation was headed by F. W. Walsh, superintendent of agriculture of the Canadian National Railways, who extended to them the facilities of the department for assisting them in their investigations.

The members of the delegation stated they expected to spend a greater part of their time in the United States, investigating very thoroughly the use of labor-saving machinery in connection with grain and root growing and will visit particularly the states of Kansas and the Dakotas. Later on they hope to visit Western Canada.

In Ottawa they interviewed Sir William G. B. Smith, high commissioner to Canada, and heads of the various branches of the federal department of agriculture. A similar mission toured Canada in the fall of 1928, and secured much valuable information.

A Good Slogan

"An Ace Of Alfalfa For Every Cow"

Takes On New Meaning

"An ace of alfalfa for every cow" is a slogan adopted in many districts where live stock is kept, and with modification it is said to suit local requirements. It is one which receives strong support by the Dominion Department of Agriculture. With the short crops of alfalfa, the application of this slogan to alfalfa, or alfalfa cover or hay crops, go far to meet the demand of the present situation, but it would also provide a useful and profitable rotation medium for keeping soil up to production capacity and assist in weed control. This slogan of alfalfa, not only provides adequate pasture but allows a surplus for feeding to other farm animals and often provides a carry-over for a year's hay.

More Milk Is Used

Consumption Per Capita Has Practically Doubled In Canada

During the past eight years domestic milk consumption per capita has practically doubled in Canada. The Dairy and Cold Storage Branch of the Dominion Department of Agriculture attributes this increase to the growing demand of the sweet milk trade and to increasing popularity of ice-cream. Canada's exports of dairy products have declined materially, and this has been due in part to the increasing domestic consumption and in part to the large numbers of high quality milk cows which have been sold to United States buyers and gone out of the country. In this connection it is noted that there were approximately 100,000 fewer good milk cows in Canada in 1929 than there were in 1927. Canadian dairymen are realizing the economic gain of the situation, however, and few sales of high grade milk cows are now reported.

Sounds Like Magic

Almost magical is the skill which was used to alter a noted restaurant in London while business was carried on as usual. By means of an ingenious device, the Empire Restaurant, which seating 250 diners, will become one. At the touch of a switch, a vanishing wall 66 feet long, 15 feet high and 10 tons in weight, will complete with decorations, lighting and doors slide through the floor.

Western Aircraft Industry

MacDonald Aircraft Limited, a subsidiary of the MacDonald Bros., Sheet Metal and Roofing Limited, of Winnipeg, is the newest addition to Winnipeg's aircraft industry. The company will manufacture EDO floats for the whole of Canada.

The cougar, while very aggressive and the lower animals, exhibit an intensive fear of mankind.

Whilst the state of Canadian business is uneven and may be regarded as disappointing compared with that of a year or two ago, it is fair in relation to world conditions, declares the Canadian Bank of Commerce. Canada's unemployment problem, though by no means negligible, is not nearly so acute as in some of the older countries, the letter points out.

During the month of March business conditions showed a gradual accession in industrial and construction operations, which tended to offset unsettlement in other branches of commerce, says the bank's letter.

"We have mentioned before that the reduction in agricultural production in power would hit its mark on the economic structure and it has proved to be the case. Until the farming community experiences favorable weather and market conditions, business as a whole will continue on a smaller scale than in the year preceding years. However, Canada is fortunate that capital expenditures on development projects continue in large volume."

The matter of European trade the bank's letter remarks that with the prospect of further substantial price advances, it seems likely that opportunities as an export market for those Canadian commodities which require an expanding market owing to Canada's increased productive power.

Prairie Cattle For Peace River

Cannot Recruit Right Type Of Cattle In British Columbia

The cattle suitable for sale on easy terms to settlers in the Peace River district have been found on prairies and will be purchased there shortly, Hon. William Atkinson, minister of agriculture, announced on his return to Victoria from a prairie tour.

"There may be some surprise that we are not securing the cattle in British Columbia for our northern settlers," said Mr. Atkinson. "The fact is that we cannot secure here the type of cattle which these people must have for their conditions. What is required is a general purpose animal. Our fine dairy cows would not endure the cold there. It is necessary therefore to secure such animals as will thrive on the prairies all the time."

Mr. Atkinson proposes to send experts of his department to the prairie states to select the animals which will be moved north in May to Peace River people. Probably about 10 animals will be sent this spring.

Ten Thousand Stings By Mail

Now Possible To Send Package Or Bee By Mail

With the improved technique which has been developed for the handling of package bees it is now possible to send them by mail, and the bee experts of the Dominion Department of Agriculture are obtaining very satisfactory results are obtained by apiarists through the use of the improved technique. The bees are sent in a wire-cased wooden frame work, usually containing two pounds of live bees. There are some five thousand bees to a pound. A shipment by mail is now possible and should a package of bees become broken open in transit ten thousand stings is the potential result.

Information Wanted

Mrs. Newby: "Oh, I wish these recipes would be more definite."
Mr. Newby: "What's the difficulty, my dear?"
Mrs. Newby: "Well, this one tells how to use up old potatoes, but does not say how old the potatoes must be."

The greatest earthquake area in the world is said to be in Italy.

The Problem Of Unemployment

The nations of the world, and more especially those of the white race, and of these those most highly industrialized, are confronted with a common problem which is becoming increasingly acute, namely, unemployment, resulting from a lack of gainful employment for hundreds of thousands of people, able, willing and competent to work, but who are unable to secure it.

The present situation is a paradox. No less competent an authority than the United States President's Committee on Recent Economic Changes reaches the conclusion that the rise in unemployment in recent years is not so much the result of recession in industry, closed factories and general depression, usually advanced as causes of unemployment, as it is the direct outcome of prosperity itself.

In other words, the intensified activity which has characterized progress in the past decade has resulted in unemployment, a paradoxical economic problem—the problem of unemployment.

The problem of unemployment has been recognized since the war as a serious one in Great Britain, and greater publicity has been given to the British situation than in other countries, largely because of the fact that in Britain, with its schemes of unemployment insurance, facilities existed for obtaining a more accurate accounting of the actual number out of work. It is now becoming more generally known that the percentage of unemployed to population is almost as high in many other countries, and higher in some. And the number of the enforced idle is increasing, until it is now estimated that 20,000,000 are out of work throughout the world.

The situation in Canada is not better than it is in the United States, Great Britain, Germany, Italy, and most other countries. Even so, unemployment is a subject of growing concern in this Dominion to all Governments, municipalities, labor organizations and business interests in general.

Of course, in a young and developing country like Canada, and particularly in view of its long winter months which necessarily slow up many of our major activities, there always has been, and in all probability, always will be seasonal unemployment. That is unavoidable, and those engaged in occupations which must slow up, or be temporarily suspended in the winter, must, like the farmer, seek a sufficient amount in the months of activity to carry him through the slack period.

But why, following the close of the most active years in the industrial history of Canada, with building construction records greater than ever before known, with development works of all kinds in progress, unemployment practically unknown, and the country at a high peak, which was the situation during the first three-quarters of 1929, should the unemployed problem be more acute than ever in the late fall and winter months? The answer cannot be found in any one thing, but is made up of many factors.

Let us consider Western Canada. In 1928, with a record crop of wheat of 640,000 bushels, this country had to import over 50,000 harvesters, thus providing temporary employment which benefited the whole country. In 1929 it was not necessary to import any harvesters, but only a small quantity of 1928 reduction in grain yield owing to drought conditions, but also largely because combined reaper-threshers machines, coupled with the use of motor trucks on a large scale, eliminated the work hitherto performed by man and horse.

Decreased volume of production resulted in a heavy falling off of railway freight rates, and a consequent loss of employment in the wheat markets. All down the line business was affected adversely, and unemployment grew.

Again, take railways. Every year witnesses increased traction power of locomotives. In the United States the traction power of locomotives per railway employee increased 11 per cent in the seven years between 1913 and 1928, but 55 per cent in the next seven years. In Canada, the C.P.R. and C.N.R. are introducing huge locomotives of great power undreamed of ten years ago. Excessive tonnage is now hauled in a single train which not many years ago would have called for the operation of two or three trains. Thus the number of train crews is lessened.

Cheap electricity everywhere has replaced steam power, and a multitude of new machines of all kinds, electrically operated, is replacing hundreds and thousands of small inefficient machines. The result is that the great industries have been built up as a result of new inventions which now employ hundreds of thousands, as has replaced the automobile industry, and its companion the truck. It has replaced the manufacture of automobiles, and the result is that the whole industry of harness is fast disappearing. The village blacksmith is almost extinct. On the one hand the automobile industry produces increased freight traffic. For the railways; on the other hand, it takes away from the railway traffic away from them.

One motor truck does the work of several horse drawn wagons; one combine replaces two binders, a threshing outfit, and a score or more stockmen, teamsters, and drivers. The result is that the demand for labor is superseded by a small army of laborers. The radio has silenced many a singer and pianist. The moving picture has closed up the theatre with its travelling shows in all but the largest cities, and now the 'talkies' with their elaborate musical presentations are finishing the work, as well as throwing thousands of men and women engaged in theatre and moving picture orchestras out of work. Each picture is its own orchestra.

Mass production aided by wonderful new machinery turns out products of all kinds in ever increasing volume, employing one man where formerly a score found work. That one man receives greatly increased wages and enjoys a higher standard of living, but his high wages are but a mere fraction of the cost of production with cheap power, machinery, and mass production the main factors of cost. So while he and others prosper, and many people enjoy things formerly denied to them because of their cost, the unfortunate displaced in this onward march of progress are unemployed and in distress.

What is the solution? No man yet knows. It will be found, because it must be. The contingencies which it will involve are too many for any writer puts it, something of the same kind of engineering efficiency which has brought about these displacements of man-power will have to be applied to the problem of finding replacements for competent men where they are needed.

Situation In Wheat

Grain Trade Not Only Too To Suffer

From Market Placings

What Canadians need to do is to quit trucking the boat; there have been market crashes in stocks of all kinds during the past few months; industry on this continent has suffered, and it is foolish to single out the grain trade as the cause of all our misfortunes. The quoted price of Canadian stocks today is \$5,000,000,000 less than it

was in July last year. Why, then, all the recriminations because of wheat, the price has dropped 40 to 45 cents a bushel, or only some \$20,000,000 all told?—Lethbridge Herald.

Does Away With Noise

Contractors In London Use Silencer

Equipped with a silencer which eliminates more than half the noise and much of the vibration, a pneumatic road drill attracted much attention when exhibited recently in London. It was made for the use of contractors who meet with protests against the noise made by the ordinary drill exhaust. The silencer, clustered around the centre of the drill, are designed on the principles of the motorcycle silencer.

British Navy Sees Changes

Admiral Sir Hugh Watson Retires After Serving For 45 Years

Admiral Sir Hugh Watson, who has served in the royal navy for 45 years, and has seen service in slave-crushing operations in East Africa, in the China and Mediterranean stations, and served throughout the World War, is retiring at his own request. He is 58 years of age. He was vice-admiral, commanding the reserve fleet 1926-28. The former admiral E. Grace, son of the famous cricketer, has been promoted vice-admiral, and placed on the retired list. He is 54 years of age. During the war Rear-Admiral Grace, then a captain, commanded the Grafton, Yarmouth, Birkenhead and the new Vendictive. The admiralty recently announced the promotion of Vice-Admiral Sir Ernle Chatfield, commander-in-chief of the Atlantic fleet, to admiral. His appointment to command the Mediterranean fleet was announced recently.

A SPRING TONIC AN AID TO HEALTH

You Can Lay the Foundation Of Good Health Now By Building Up Your Blood and Strengthening Your Nerves Through The Use Of Dr. Williams' Pink Pills.

The good old fashion of taking a tonic in the Springtime, like the custom of our forefathers, is based upon sound common sense and good medical science. Winter is always a trying time for those who are not in regular health. Many men, women and children go through the winter on reserve strength they have stored up during the sunny summer months, and grow increasingly pale and languid as the spring days approach. A tonic of the blood and nerves is the best way to get back to health, by putting color in the cheeks and building up the strength of the system. The weakness of people at this season of the year.

It is impossible to be energetic if your blood is thin and weak, or if your nerves are overworked or shattered. You cannot compete with others if you do not get refreshing sleep at night, or if your appetite is poor, or if you are losing weight. You need a tonic to make all your other factors efficiency now, as well as to save you from suffering later on.

British Headmasters Are Visiting Canada

Means Important Step Towards Empire Solidarity Says Official

The visit of the British public school headmasters is regarded by educational authorities throughout Canada as an important step toward the goal of empire solidarity and understanding," said Kenneth Lindsay, advance agent for the party, who returned to Montreal, having concluded a preliminary tour of the Dominion and completed arrangements for the tour. Mr. Lindsay left the city for Quebec and Saint John, N.B., where the 15 headmasters arrived on the Canadian Pacific liner "Duchess of Bedford."

Nine Universities will be visited according to Mr. Lindsay. These include Dalhousie, McGill, Kingston and Toronto Universities, the Universities of Manitoba, Saskatchewan, Alberta and British Columbia, and Laval University, Quebec.

The party arrived in Montreal on April 11, having visited Halifax, Quebec, and Shawinigan Falls. They left Montreal for their western tour over Canadian Pacific lines on April 13, arriving at Ottawabank on the same day. Thence they proceed to Toronto, Winnipeg, Regina, Vancouver and Victoria.

The headmasters are all principals of important British public schools. Among schools represented in the party are Charterhouse, Bedford, Christ's Hospital, Halesbury, St. Paul's, Marlborough, Applethorpe, Alchester Grammar School, Mill Hill, Whitgift, Wrexham, George Watson's and Dauntsey.

Ampleforth College, important Catholic school, conducted by the Benedictine Order, is represented by V. P. Neville.

Invention For Blind Standard Typewriter Keyboard Can Be Converted Into Braille System

John Lemp, typewriter designer, has patented an invention whereby the keyboard on any standard make of typewriter may be converted into a Braille keyboard, and blind persons, who may wish to take up stenography.

The invention consists of a set of brass caps, embossed with Braille letters and figures instantly detachable.

Mr. Lemp, who has a blind daughter, has offered the invention free to institutions for the blind.

Minard's For Failing Hair

Use Good Seed

In the opinion of a successful hairdresser, the most successful method of restoring seed closely traceable to registered is preferable because it produces uniformity in ripening, in appearance and in the shape of kernels. Impure or mixed seed is sure to produce a sample with different types and lacking in uniformity.

Largest Deposit Of Diamante

The largest deposit of diamante in the Dominion at present known is in the vicinity of Queneau in central British Columbia, where material of pure grade occurs in beds forty feet thick that extend over a huge area.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

Doctor: Your throat is in a bad state. Have you ever tried gargling with salt water?

Salt: Yes, I've been shipwrecked a dozen times.

Remains of an old Roman wharf, where no doubt the emperors' pleasure galleys were once moored, have been found at Lake Neim.

Minard's Has Wonderful Antiepileptic Power.

New Line To Bay Shortens Route

Sturgis Cut-Off Will Be Ready For Operation Early In May C.N.R.

Construction work on the Sturgis-Hudson Bay Junction branch line of the Canadian National Railway will be finished about May 18, and the line will be turned over to the operating department on that date. An announcement to the effect was made recently by A. E. Warren, western vice-president of the company.

A very considerable saving in time and distance between southern Saskatchewan and the Hudson Bay Railway will result with the completion of this line and the opening of it for regular freight and passenger service. Between Regina, Moose Jaw and other southern points in Saskatchewan there will be a lessening of 94.6 miles over the existing route from those centers to The Pas and the Hudson Bay Railway.

Until the Sturgis-Hudson Bay Junction line goes into operation the route from Regina to Hudson Bay Junction is via Swan River, a distance of 429.6 miles. The distance by way of the new route which lies through Melville, Yorkton, and Canora will be 335 miles.

Passenger and freight train services are now under consideration by the departments concerned but it is not expected that an announcement of a train service will be made for a few weeks.

The Sturgis-Hudson Bay Junction line was one of those included in the three-year branch line programme which was passed by parliament in 1927. Although it is practically the last item on that programme to be completed, the date upon which it is to be turned over for operation is more than six months ahead of that provided by the bill. This is due to the extensive record of the engineering forces of the Western Region of the Canadian National Railway in completing all its construction work months ahead of the limit set by parliament. The laying of steel to Churchill and the completion of the Flin Flon and Sheridan Railways and the Aberdeen-Melfort branch line are other examples.

Ashtara Cannot Last When the Great War Is Over

Ashtara cannot last when the great war is over, says the official used, Dr. J. D. Kellogg's Ashtara Remedy assuredly deserves this accolade. It has to its credit thousands of cases which other preparations have failed to benefit. It brings help to even the most severe cases and brings the patient back to a condition of blessed relief. Surely suffering from ashtara is needless when a remedy like this is so easily secured.

Make Many Tests

Every year the Physical Testing Laboratory of the Topographical Survey, Department of the Interior, tests several thousand chemical elements for government departments, or for the general public. A certificate is given for each chemical element, which successfully passes the required tests.

Carloads of scrap films from Hollywood are shipped to refineries so that the silver in them may be recovered.

Foods Stay Fresh Longer This Way

Covered with a heavy waxed paper goods that usually stale in a day or so stay fresh for quite a long time. Try it. Get Pure-Band in the handy, sanitary, knife-cut corner at grocer, or give with water. For less exciting uses get 'Centre Pull' Packed sheet form.

New "Ice" Discovered

New Liquid Yet Unnamed, Boils At 18 Degrees Below Zero

Discovery of a new refrigerant which, it is held, will bring about a vast improvement in living conditions, has just been announced by a division of industrial and engineering chemistry of the American Chemical Society.

The refrigerant, as yet unnamed, is a compound of carbon, chlorine and fluorine and is technically known as fluoro-chloro-methane. It is a clear white liquid, boiling at 18 degrees below zero Fahrenheit. Commercial production of the announcement said, will probably not be practicable for at least two years.

Miller's Worm Powders destroy worms without any injury to the child, and so effectively that they pass through the system unimpaired. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

Combines In Western Canada

The successful introduction of the combine into Western Canada by the Dominion Experimental Station at Swift Current, Saskatchewan, in 1922 has aided materially in establishing this system of harvesting in the Prairie Provinces. Since its introduction in 1922, the use of the combine has spread till in 1928 over 8,600 combines were sold in Western Canada.

Stops a Cough In One Night

A cough may be Catarrh with a dry tickling in the throat. It may be accompanied by partial stoppage of the nostrils and discharge of mucus. Often there is a gagging in the throat, and every cough tears and hurts.

Coughs have a hundred different causes. Yours may be due to any of the following:

Asthma Inflamed Throat
Emphysema Bronchitis
Enlarged Tonsils Pneumonia
Inflammation Croup
Stomach Disorders Pleurisy

One remedy upon which physicians are relying today is Catarrhine. It removes the cause of the cough, doesn't smother it.

It's simply wonderful to think how quickly a bad throat or catarrh can be helped with Catarrhine. Its rich balsamic vapor is carried along with the breath to the innermost recesses of the lungs, bronchial tubes and chest, making it impossible for the germ of Catarrh to live. This soreness in the chest is at once alleviated, phlegm is loosened and ejected from the throat, old standing coughs are removed.

REMEMBER THIS: When you breathe Catarrhine and it will alleviate coughs, colds, catarrh, and weak throat. Large size, guaranteed, costs \$1.00, and lasts two months; smaller sizes, 50c and 25c. Beware of cheap ones and insist on "CATARRHINE-ZONE."

WORLD HAPPENINGS BRIEFLY TOLD

Activity in civil aviation in Canada doubled during 1929 according to figures made public at the National Defence Department.

On its annual arctic cruise this summer, the S.S. Beothic, will endeavor to reach Melville Island, situated 360 miles beyond the most westerly point yet reached by steamship.

Prominent railwayer, pioneer of the West, and veteran of the Riel rebellion, W. H. Tomkins, 68, died recently at his home in Winnipeg. He was captured and held prisoner at Batouche, Sask.

Rev. Mrs. Montagu Newman was elected governor of the Bank of England. This makes her the eleventh woman in which he will fill the office of governor to which he was first elected in 1920.

J. H. Nesbitt, of Shoal Lake, prominent dairyman, has been granted an honorary diploma from Manitoba Agricultural College. The honor reflects the established custom of honoring each year one outstanding man in Manitoba's agriculture.

In a motion adopted by city council, of Toronto, police commissioners have been asked to prohibit the operation of a "bad and doubtful" collecting car, whose driver, clad in a brilliant uniform, with his gaily decorated car parked in front of homes of debtors, has made a good deal of unbecoming attention.

Ralph Hull and Ralph D. James, of Vancouver, students at the University of British Columbia, have been awarded mathematical scholarships, valued at \$1,000 each, by the University of Chicago. These are the first awards of the institution to Canadian students who plan to specialize in mathematics.

Because "the results were not very satisfactory," there will be no repetition this year of the provincial government's placing British trainees on Ontario farms. Hon. John S. Martin, minister of agriculture, has stated. Any trainees that do come, he added, will have to come under the United Church settlement scheme, the Dominion government or the railway companies.

Many Uses For Spruce

The wood of all Canadian spruces is tasteless and odorless, making it valuable for food containers. It is also in great demand for musical instruments, principally for organ pipes, piano sounding boards, violin backs, etc.

Inquiry by experts of the Mayo Foundation indicates that rheumatic persons can "sense" the approach of rain.

Dandruff

You needn't be bald. Minard's kills dandruff, checks falling hair, stimulates new growth and adds a healthy gloss. Rub into scalp with your finger tips, four times a week.

W. N. U. 1833

London Woman Fills Important Position

Made Chairman Of Central Public Health Committee

A woman has been chosen at the head of a vast public undertaking of vital importance to thousands of Londoners.

On April 1, the old boards of Guardians will have ceased to exist, their functions as far as the County of London is concerned will be exercised by the London County Council. A new committee, called the Central Public Health Committee will be responsible for all the infirmaries, hospitals and institutions previously administered by the Metropolitan Asylums Board, and also for the public ambulance services now administered by the London Fire Brigade and the M.A.B.

The chairman of this committee, which will have the health and welfare of thousands of Londoners under its control, is Dr. Florence Barrie Lambart, a well-known member of the London County Council, and the chairman of the old Public Health Committee, which under the new regime becomes a sub-committee of the Central Committee.

It is a colossal job to place upon the shoulders of a woman. It involves the care of the necessities of a city of millions.

An Exciting Pursuit

Cave Exploration Has Added Much To World Knowledge

An archaeologist says there are numbers of caves yet to be explored in England with good prospects of "treasure" throwing light on prehistoric periods. In Derbyshire at least a dozen caves have this summer been explored for the first time. Here there were human jaws and other bones, remains of cave bears, and antlers of the giant elk, a creature from ten to thirteen feet high, which is not to be met with in Derbyshire nowadays. Cave exploration is an exciting pursuit, and its results have varied parts of the world have added a great deal to the knowledge of early man and the beasts he came to contend with.

Winnipeg Newspaper Union

(By Annette Worthington)

3376

A pale blue and white printed dress with crisp white organdy collar and cuffs and a green ribbon tie, that is very French. The full gathered skirt emphasizes the formal waistline of the little basque bodice. The scalloped hem of skirt may be edge-trimmed or finished with bias binding.

Style No. 3376 comes in sizes 2, 4 and 6 years.

Gingham, checks, linen, printed lawn, Peter Pan prints, organdy, crepe de chine, plaid and batiste appropriate.

For parties it is adorable made of pink tulle. Bind scalars of collar and skirt with bias fold of the tulle. Choose turquoise blue gingham ribbon.

Pattern price 25 cents. Be sure to fit in size of pattern. Address: Pattern Department.

Experiment a Success

Complete Newspaper Page Sent By Radio From San Francisco To New York

The complete front page of a newspaper has been transmitted across the country by radio for the first time.

Giving the present a peep into what the future of the newspaper will be, the engineers of the General Electric Company at Schenectady, N. Y., reported that successful experiments had permitted them to send the first page of the San Francisco Call-Bulletin three hours after it had left the press. It was reported to be in full size in the laboratory of a new type automatic carbon receiver, connected to short wave receiving equipment actuated by signals originating 2,000 miles away.

The engineers did not hesitate to forecast many possibilities for this improvement in facsimile transmission, which, while still in a highly experimental stage, gave an indication that some day radio may be delivering a large part of business mail and also bring daily newspapers directly into the home.

Appears In Real Life

Forgetful Professor Gives Luncheon And Forgets To Attend It

Professor Alfred A. Michelson, distinguished University of Chicago scientist, gave a luncheon for Dr. Leo DeForest, radio tube inventor, and forgot to attend it. It was a gathering of famous scientists at the invitation of Professor Michelson to honor Dr. DeForest. The distinguished guests waited and waited. The soup got cold. Finally Dean Henry Galt, of the University of Chicago physics department, stepped in as substitute host and the luncheon went on.

Heart and Nerves

Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes: "Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold."

"I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by Mr. Milburn Co., Limited, Toronto.

Passenger Air Service

Air Mail Service Will Now Take Passengers On Prairies

Western Canada's first passenger air service across the prairies was officially inaugurated recently by the air mail contractors, Western Canada Airways, with the issue of an official scale of transportation rates from Winnipeg to western cities now served by the air mail planes.

The new rates for carrying passengers over the sky route across the western prairies are approximately the railway fare plus one-half. J. A. McDougall, secretary of Western Canada Airways, said last night, and officials of the company believe that it will not be long before the travelling public will avail themselves of the new and swift means of transportation.—Free Press.

Will Combine Exhibits

Saskatchewan, Manitoba and Alberta will combine their exhibits at the World's Poultry Congress to be held in London, England, next July. The exhibit will occupy a frontage of 36 feet and will be the largest of the provincial exhibits.

Strengthening Butter Boxes

Recent tests on butter boxes at the Forest Products Laboratories, Department of the Interior, showed that the wire applied around the centre of the box doubles its strength.

Middle-age is the period when you know a dozen dandy ways to regain vim and vigour if you only had time.

Horses Do a Half More Work When Clipped

Clipped horses work easier. Do not sweat the strange way. Groomed in a quarter of the time.

Ask for "Clipping Machine" at Stewart Clipping Machines.

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid headache by temporary relief, the cause of the headache still remains within. The cause and harmful way. First correct the cause, sweeten the sour and acid, and remove the waste material of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bile will pass off the waste matter which causes so much trouble. Try Carter's Little Liver Pills. Druggists 25c red boxes.

Recipes For This Week

(By Betty Barclay)

VEAL A LA KING

2 pounds lean veal.
1 cup butter.
4 carrots.
2 onions.
1 bay leaf.
4 cloves.
1 quart cream.
1 sweet pepper.
1 can mushrooms.
1 can sifted peas.
2 cans noodles.

Two pounds of lean veal—trim off the fat and cut into cubes about one inch square. Brown slightly in 1/4 cup butter. Add water to cover well. Add 6 medium-sized carrots, 2 medium-sized onions cut up, 1 sweet pepper, 1 bay leaf, 4 cloves, and boil all together until meat is tender. Do not let water boil down—add enough to keep about 1 pint of liquid. Add 1 quart of sweet cream which has previously been heated to boiling point, thickened as for gravy, and add one can mushrooms cut up, 1 can sifted peas. Salt to taste. Add 1/2 teaspoon paprika. Serve on chow mein noodles.

PANAMA SALAD

(Serves 4)

4 slices pineapple.
2 large oranges.
1/2 head lettuce.
4 Maraschino cherries.
1 green pepper.
Place slice of pineapple on bed of lettuce. Lay sections of orange on pineapple slice, to form a domed appearance. Cut a section of cherry and place on top of fruit sections. Rosette is made by cutting the cherries into six or eight sections leaving it joined at the tip. Two diamond-shaped pieces of green pepper are placed on each side of the salad, near the cherry. Serve with French dressing.

Canada's Oldest Men Dead

Within a period of less than three weeks death claimed the two oldest men in Ontario, and two of the oldest in Canada. James Wilson, 109-year-old negro, died at his home in W. land, Ont., and two weeks later at St. Joseph's hospital, Peterboro, James Hendley, of Peterboro County, died in his 109th year.

SUNDAY SCHOOL LESSON

APRIL 20

JESUS TEACHING FORGIVENESS

Golden Text: "Forgive us our debts, as we also have forgiven our debtors."—Matthew 6:12.
Lesson: Matthew 18:15-35.
Devotional Reading: Psalm 32:1-7.

Explanations and Comments

How To Treat Offenders, verses 15-22.—Jesus' parable about the Good Shepherd, illustrating His care for those who go astray (our lost sheep), is followed in Matthew's Gospel by His counsel in regard to man's treatment of offenders. He advised His disciples first to tell the offender of his fault, then to rebuke him in the presence of two or three others, and then, if he still gave no heed to their words, to tell him off to the Church. "When two or three are gathered in My name," he added, "there am I in the midst of them."

Unlimited Forgiveness, verses 22.—Peter's question about forgiveness of offenders naturally followed: "Lord, how often shall my brother sin against me, and I forgive him?" Seven denoted the perfect number. Peter's heart glowed with self-complacency. He did not feel ready to go much farther in forgiveness of the ordinary man? Did not the Talmud say "When a man sins against another, but other forgives him once, he forgives him a second time, he forgives him a third time, but the fourth time he does not forgive him?" "No," Jesus answered, "not until seven times seventy times seven." Magnanimity is not calculating, there is no arithmetic in the grace of forgiveness, or, as Dr. Jewett pointed out, "the grace of forgiveness is the scaling power of arithmetic with its weird wing."

Peter himself was an illustration of the grace of unvaried forgiveness. He sinned, and sinned, and sinned again. Dr. J. D. Jones faces it himself. "O to Jesus, how great a debtor daily I am constrained to be! Again and again taking himself and again and again taking himself as a sinner and preaching a sermon of comfort and hope to downcast and despairing souls."

"O Man! forgive thy mortal foe! Nor ever strike him blow for blow! For all the souls on earth that live, To be forgiven must forgive, For forgive him seventy times seven; For all the blessed souls in heaven Are both forgivers and forgiven."—Tennyson.

Carloads Of Horses

Animals Being Assembled At Moose Jaw For Spring Work

Under the management of the Saskatchewan Co-operative Live Stock Producers, Limited, the horse marketing section of that organization is undertaking to assemble carloads of horses at the Moose Jaw yards in readiness for spring work. With the aim of improving the condition of these horses they will be fed for a few weeks before offering for sale. This affords buyers an opportunity to visit the yards and select their teams.

Completes Long Air Journey

Bishop Geddes Makes Trip From Alaska To Edmonton

Covering the two thousand miles from Alakivik, on the Arctic coast, to Edmonton, in 17 hours of actual flying time, His Lordship Bishop W. A. Geddes completed a trip March 30 which would have taken ten weeks of ordinary winter travel. In open water, the journey by steamboat would have lasted three weeks.

The bishop, accompanied by Mrs. Geddes, left Alakivik in a Commercial Airways aeroplane piloted by Capt. W. R. (Wop). May it be 35 below zero when the machine left Alakivik. This was ordinary winter weather at that point, although a bad storm was experienced the week before.

On over Fort McPherson, Arctic Red River, Fort Good Hope, the machine passed in completing the last air mail trip to the Arctic before the ice breaks up. When Fort Norman was reached for the end of the week's flying, it was 40 above zero after a heavy rain had fallen.

On the second day, Fort Simpson, Hay River, and Fort Resolution were reached, while the second night was spent at Fort Chipewyan. Pilot May went on to Fort McMurray and Pilot Glyn Roberts called at Chipewyan and picked up Bishop and Mrs. Geddes whom he brought on to Edmonton.

Income Tax Collections

A total of 137,011 persons paid income tax during the fiscal year ended March 31, 1929, and the sum collected was \$38,422,323.25, the largest amount yet gathered in by the Federal authorities. In 1928 there were 215,277 taxpayers who paid in \$55,701,961.57.

A FIVE POWER NAVAL PACT HAS BEEN REACHED

London, Eng.—After many weeks of negotiation the five great navies of the world have reached an agreement. There will be a five-power naval limitation agreement and three powers—the United States, Great Britain and Japan—will sign certain additional clauses to which the two Latin nations do not at this time, feel they are able to subscribe.

There will be the two understandings, the partial agreement of the five and the complete accord of the three.

Political discussions regarding a security pact and definition of the extension of the Washington capital ship holiday until 1936. This means an extension of five years.

The five-power agreement which would bring within the scope of the Washington treaty, limitations in aircraft carriers under the 10,000-ton limit and the Washington limitations on this category applied only to those over that tonnage.

A treaty among the five powers in the direction of the humanization of submarine warfare.

A treaty among the five powers covering special exempt vessels not covered by the Washington treaty.

A five-power treaty on 'methods of limitation. This covers the old problem so prominent at Geneva of the limitation by tonnage of tonnage as against limitation by categories.

The foregoing provisions will be signed by all the powers attending the conference.

The three-power agreement of Great Britain, the United States and Japan goes further. It limits not only the battleships and aircraft carriers, but it limits all categories of warships. It covers cruisers, in the matter of which the United States and Great Britain differed so radically at the Geneva tri-partite conference in 1927.

It is understood that the following limitations of tonnage will apply:

Cruisers carrying eight-inch guns: British Empire, 16,000 tons; United States, 16,000 tons; Japan, 10,400 tons.

Destroyers: British Empire, 1,500 tons; United States, 1,500 tons; Japan, 1,000 tons.

Submarines: British, the United States and Japan to have 52,700 tons each.

The only naval restriction affecting France is that in respect of the extension of the Washington battleship holiday and also that concerning aircraft carriers. France, however, never built up a fleet of battleships and the Washington treaty allowed her the right to build.

Bill Given Hoist

Legislation on Resources Agreement Will Stand Until After Easter

Recess

Ottawa.—Legislation to ratify natural resources agreements with the four western provinces will not be proceeded with until the first of next month.

A misunderstanding was the cause of an unlooked-for delay.

Hon. Charles Stewart, Minister of the Interior, told the House of Commons that the four bills could not be proceeded with until after the recess as he was not prepared to complete ratification at this time.

Drafts of the agreements have been returned by the governments of Saskatchewan, Manitoba, Alberta and British Columbia.

Suggests Pensions For Blind

D. B. Lawley Advocates Aid For Those In Isolated Areas

Ottawa.—Pensions for blind persons living in isolated parts of the country were advocated before the Canadian Federation of the Blind by D. B. Lawley, travelling secretary of the organization.

There are 7,000 sightless persons in Canada, he said, the majority of whom lost their sight after reaching 50 years of age. The handicap, he explained, weighed much heavier on those living in rural areas. He recommended that federal and provincial advisory committees be dealt with the welfare of these unfortunate.

For Royal Ranch

Peace Memorial Park

Shipment Of Thoroughbred Stock Arrives From England

St. John's—Seventy head of the finest thoroughbred stock arrived here from England destined to go forward by the Canadian Pacific Railway to the Prince of Wales in High River. This is the first shipment made to the ranch for four years, and great care has been taken by Professor Carlyle in the selection of the animals to secure the very finest types.

The well-pedigreed short-horn cattle, all of which have passed the extreme tuberculin test, are quite the best shipment that has ever been brought to Canada in my experience," Professor Carlyle said. They represent purchases made from some of the most famous Scottish and English breeders as well as a selection of nine two-year-olds and three yearlings, heifers from the home farm at Strathclyde, Cornwall, which are of the Prince's own breeding.

These heifers are of certain notable short-horn families not at present represented on the ranch. Included in the contingent are 30 Hampshire Down sheep, three of which were prize-winners at every agricultural competition in which they have taken part. They will improve and supplement the herd on the ranch at present, which has enjoyed such success, ranch having been started by a half-brother of the ranch from Texas to the Peace River.

National Fuel Policy

Matter Brought Up In House Of Commons In A Series Of Questions

Ottawa.—The question of a national fuel policy for Canada is being brought up in the House of Commons in a series of questions propounded by L. T. Church, (Cons., Toronto North).

"What steps have been taken to carry out a resolution which passed the House of Commons in 1926-27 for a national coal supply for Canada by which all coal would be mined and coked under the British flag, whether from Wales, Nova Scotia or Alberta?"

"Has the attention of the government been called to allegations made of swamped labor" regarding coal for Canada from Russia made in the House of Commons, London, April 7, by Sir Newton Moore, (Richmond)?"

"What steps does the government propose to take to secure contracts for Russian coal coming into Canada to insure the carrying out of the terms of the foregoing resolution?"

"Is the government aware that 25,000 tons of Russian coal have recently been sold to a Montreal firm, which has been coked and coked under the British flag?"

New Trade Relations

Germany To Cultivate New Markets Along With Adjuncting Countries

Berlin.—Cultivation by Germany of closer commercial relations with her eastern and south-eastern neighbors, possible at the expense of present trade relations with Canada and the United States and Argentina, was urged by Hermann Dietrich, vice-chancellor and minister of economics.

He mentioned that the adverse trade balance with Canada was 216,000,000 marks, with the United States, 796,000,000 marks, and with Argentina, 370,000,000.

"They send us their surplus agricultural produce but decline to buy from us to the same extent. Consequently we must seek our commercial relations with the border states is perhaps the most important task of Germany's economic policy, and this applies equally to Poland and Rumania," he said.

Might Make Canadian Lumber

Ottawa, Ont.—A party of British Columbia manufacturers, who recently visited Australia and New Zealand, have been in conference with Hon. James Macdonald, Minister of Trade and Commerce, and said a friendly attitude to Canadian products was observed and it is believed that if a revision of the Australian trade agreement was considered, Australia might be prepared to give a preference to Canadian lumber.

Floods Threaten Manitoba Farms

Winnipeg, Man.—Rising river-levels west of Winnipeg, forced farmers to resort to dynamiting ice-jams in an effort to relieve them from threatened floods. Sunday morning of the level of the Assiniboine River at Winnipeg, about 40 feet higher than normal, promises to inundate miles of farm land unless the ice is allowed to flow free.

Money To Be Raised By B.C. School Children Donating Ten Cents

Vancouver.—Money subscribed in ten-cent pieces by the school children of British Columbia will be devoted to laying out of a peace memorial park on the Canadian side of the Peace Arch at the international boundary between British Columbia and the state of Washington. It was decided at a meeting here by the International Peace Memorial Association.

The United States end of the Pacific highway is being devoted to the Peace Arch, and the Department of Public Works, at Victoria, is changing the Pacific highway from its present position to the right-of-way to the arch.

The work of the International Peace Memorial Association will be to establish a magnificent park area on the Canadian side of the Peace Arch. The Dominion Government has agreed to turn over certain lands there for a park.

WAR VETERANS ALLOWANCE ACT IS ENDORSED

Ottawa.—Broadly speaking, the ex-soldiers' organizations of Canada endorse the War Veterans' Allowance Act. These organizations are for granting to unemployed ex-service men a certain monthly allowance at the age of 60, said Le-Col. L. R. La Fliche, president of the Canadian Legion, to the special parliamentary committee on returned soldiers' problems. The bill provides for granting the "burned out" veteran, who is wholly unemployed, eligible for the grant before he has reached 60 years of age.

What was anticipated as a contentious matter was the clause which establishes a departmental committee, under direction of the minister, to control the operation of the act. The minister of pensions, Dr. H. K. King, informed the committee that on this departmental body the veteran would have an honorary member and also honorary members on the various district boards.

Col. La Fliche, speaking on behalf of the veterans, declared that this new provision would be satisfactory inasmuch as it would enable the veterans' organizations to keep in touch with the decisions of the committee. He said that the veterans desired it to be made clear that this bill should not have any bearing on the provisions of the Pensions Act.

Shipped As Waste Paper

Large Liquor Cargo Seized At Niagara By U.S. Customs

Niagara Falls, Ont.—A cartload of waste paper, billed from Port York, around the suspicions of United States customs officials across the Niagara River. Working on the theory waste paper is not shipped across the distances, the officials seized the car and discovered more than 1,000 cases of rare wines and cordials, hidden under the layer of waste.

The liquor was dumped into the river from the lower bridge to the great delight of boat owners. Word quickly spread that liquor was being thrown over and many persons rowed down under the bridge and salvaged bottles which had not broken.

VISITS BIRTHPLACE

Mrs. Almes Temple McPherson, noted evangelist, who, heading her pilgrimage to the Holy Land, stopped at London, Ont. her birthplace, to mark a halting showing how she would determine six contentious problems of the day.

Canada's Relations With Russia

Are Very Similar To Those With Other Countries

Ottawa.—Diplomatic relations between Canada and Russia are similar to those existing between the Dominion and other countries in which the exception of those countries in which Canadian legations are located. This statement was made in the House of Commons by Premier Mackenzie King, Russia, the prime minister, had enjoyed certain special diplomatic privileges which had been discontinued several years. The result of the discontinuance of these special privileges, however, was that, with relations with Russia, diplomatically, were on the same footing as with Austria, Italy and such countries. A Canadian desiring to go to Russia, the prime minister remarked, could secure his passport in Ottawa, and have it used by Russian authorities.

Eastern Canada Interested

Ontario Grain Growers Plan To Enter World Grain Show

Toronto, Ont.—Eastern Canada grain growers have already started plans to enter the world grain show at Regina, still two years away.

A few smattering prize lists which have found ways into agricultural centres here have resulted in a flood of requests for more and these requests are being communicated to the Regina promotional headquarters.

Seven of the leading grain growers of Perth County, two of them consistent winners in Ontario competitions, recently declared at Bradford that they have already started developing seed for the world show. Middlesex farmers have also started organizing.

New Fuel Oil For Planes

Bedford, Conn.—A new process for an airplane motor which permits use of all grades of fuel oil has been successfully demonstrated by the Pratt and Whitney Aircraft Company. The device eliminates the usual carburetor and intake system of the gasoline engine by a new system of direct fuel injection.

Duchess Takes Up Aviation

London, England.—The Duchess of Bedford, who is 65 and an aviation enthusiast, made her first solo flight in her own baby plane at her home, Wootton Bassett, Bedfordshire.

Distinguished Visitors

Will Attend Passion Play

Ottawa.—The Minister of the Interior, Hon. James Macdonald, of England, has ordered tickets for himself and family for the Passion Play to be presented here this summer.

New Post Office For Brandon

A permit for \$250 has been given to cover the erection of the new post office in Brandon, for which ex-cavalry work has begun.

Natural Resources Bill

First Reading Of Bill To Ratify Agreement With Saskatchewan

Ottawa.—The bill to ratify the agreement between the Dominion Government and the Government of Saskatchewan, transferring the unlimited natural resources of Saskatchewan to the provincial government was introduced in the House of Commons recently and given first reading. The only difference between this agreement and the one made with Alberta, Hon. Charles Stewart, Minister of the Interior, explained, was a clause providing for submission of certain questions to the courts. This litigation will not delay the transfer of the resources. They will be handed over as soon as the agreement is ratified by parliament and approved by the Imperial parliament.

Miners Will Not Strike

Lethbridge, Alberta.—There will be no strike in the Lethbridge mines. The result of a vote announced at a meeting of the miners was 278 for abstention and 142 for strike action.

The miners will now apply for a board of conciliation under the Lethbridge Conciliation Act. The miners will consider their demands, which include a small increase in wages and recognition of the Mine Workers' Union of Canada.

SAYS BRITISH NAVAL POLICY IS DANGEROUS

London, England.—Great Britain's naval policy is dangerous, Admiral Lord Wemyss said recently that the British future as a maritime power was fraught with grave possibilities.

Lord Wemyss pointed to the reduction of 46 per cent. in the British naval estimates as compared to 1914 "concurrent with an enormously increased national budget."

"This is the backbone of British industry," he said. "If the nation is asked, to be sacrificed in order that docks and pensions shall be provided on a more magnificent scale for those who, in many cases, might be usefully employed in developing empire resources and helping to protect the nation's overseas interests."

"Let us hope that the reaction which must inevitably come sooner or later, will result in a more realistic view of our naval requirements may use with the power to act before our national resources in men, money and materials are irretrievably lost through a policy of mistaken confidence and extravagant expenditure in profitable channels."

"The suggestion was made in parliament recently that the admiralty should take opportunity of the present session to call a conference of delegates, to discuss the question of reducing the contributions of the Dominion of Wales to the Imperial navy. Lord Wemyss, secretary to the admiralty, said the question is more appropriate for the Imperial Conference."

H. Ramsbottom (Cons., Lancaster), who had raised the matter, in rebuttal the real reason for not discussing the question was that the British Government had "pinched" the contributions of those Dominion interested in the Singapore naval base, by announcing work had been slowed down on this base without giving anything about return of money contributed. Mr. Ammon did not reply to this.

"While all the self-governing communities of the British Empire have an equal claim on the protective role of the navy, they take widely varying views of their obligations towards the cost of Imperial defence," remarked the Weekly Review, Truth, recently.

The statement was provoked by study of the memorandum on respective contributions of Great Britain and the Dominions, released by the first lord of the admiralty last week. This showed the expenditure on the part of the Empire was \$5,000,000, \$1,850,000, New Zealand, \$2,470,000, 37 cents; South Africa, 37 cents only, 22 cents.

An even more striking manner of expressing these inequalities is the proportion of expenditure on naval defence to the value of the imports and export trade protected. Truth continues, "The moral seems to be that the British navy is a relic of another naval war, and that it is only wasting money to provide against it."

NO DECREASE IN WHEAT ACREAGE NOW EXPECTED

Winnipeg, Man.—Acreage of wheat on the prairies of the west will not show a decrease this year, according to indications at present. This is the verdict of farm authorities in Manitoba, Saskatchewan and Alberta, as expressed by the Canadian Press. Spring rains, however, are characterized as a generally necessary means of replacing depleted sub-soil moisture.

Forecasts of ultimately decreased wheat-areas in the west are not unfounded, nevertheless, by the opinions that acreage will remain "much the same." It is conceded on all sides that weather during the winter of April, 1930, might quite reasonably affect a cut in the expanse of territory seeded to wheat.

While pleas for acreage cuts have been heard in several parts of Saskatchewan the wheat pool, which controls now the Canadian prairie province's wheat yield and as large a proportion of the entire prairie crop has no such plea. The pool's strict sowing. Pool officials have gone no further than to advise against sowing of land that is not at least in fair condition. They believe that this year farmers should not take a gamble which might be considered a better one. They advise, in the language of the farmer, that numerically he given the grain has been sold. The pool, said McPhail, of the pool, has stated that the question is one for the individual farmer to decide.

Two years ago the United Farmers of Canada, Saskatchewan section, have passed resolutions asking the government to advise that farmers of the province cut down on wheat acreage. Lethbridge local took the stand a week ago and Willie Cook, a farmer, said that the U.F.A. has announced no attitude on the matter, but it is recalled that the government has advised that control of production offers the only solution for the surplus grain problem.

First advocacy of reduced acreage in Saskatchewan came from Mayor John W. Hild, of Saskatoon, who in 1927, in annual convention might well advise that wheat-areas be cut down. No such stand was taken by the convention, however.

By the time seedling is under way, the acreage of wheat is expected to strike about the average starting-time, though not a few days early. Though scattered reports of sowing have been received from virtually all parts of the prairies, southern Manitoba and northern Alberta are probably the most advanced at the present time.

Little seedling has been done in Saskatchewan, where some 60 per cent. of the entire crop of Canada is produced. Throughout the province, though, acreage will be cut down. This is anticipated in the opinion of superintendents of experimental farms at strategically located points.

Colonel Ralston Is Returning To Canada

Hon. Philip Roy Taking His Place At Disarmament Conference

London, England.—Col. the Hon. J. Ralston, head of the Canadian delegation to the naval disarmament conference, with Mr. Ralston, have sailed on the steamship "Briton" for Canada. The liner sailed from Southampton for Halifax, where it is due to arrive April 18.

Col. Ralston's place will be taken by Hon. Philip Roy, Canadian minister at Paris. Pressure of parliamentary work and work in his department of national defence necessitates the return of the Canadian cabinet minister.

Will Attend Passion Play

Ottawa.—The Minister of the Interior, Hon. James Macdonald, of England, has ordered tickets for himself and family for the Passion Play to be presented here this summer.

New Post Office For Brandon

A permit for \$250 has been given to cover the erection of the new post office in Brandon, for which ex-cavalry work has begun.

Spain is preparing to take a national census next spring.

CHAMPION CHATTER

VOL. 3

Thursday, APRIL 17, 1930

No. 9

Published in the interests of the People of Champion and Farmers of this vicinity.
GEO. L. DEPUÉ, Editor.

Why does an egg float in salt water and not in fresh water?
Because salt water is a little heavier than fresh water. The volume of fresh water which the egg displaces weighs a little less than the egg, so the egg sinks.

Cream separator experts say: "One of the most common causes for loss of butter in cream separators is skimming bowl underspeed, caused by old-fashioned plain bearings that bind and drag and make the machine hard to turn."
It's easy to run the Mc-Dr. Ball-Bearing Cream Separator at the right speed to get all the butter. The ball bearings and automatic eliminate friction. No dragging and no lost profits.

"Good Equipment Makes a Good Farmer Better."

"Picnic, have you ever heard the story of the Scotchman who made a donation to charity?"
"No John."
"There was nothing to it."

Some time when you want to hear us talk a long time, ask us to read off the names of all the folks who have bought Mc-Dr. tractors during the past two or three years. John Kline is the latest convert.

Teacher: "It gives me great pleasure to mark you 85 for your examination."
Johnny: "Why not make it 100 and give yourself a real thrill?"

Chas. McDougall and Geo. Bailey have taken out their new Mc-Dr. tractors along with a Mc-Dr. front end delivery drill and 12 foot cultivator.

Some folks learn from experience; others never.

recovered from them. Barney Hummel told us a good one the other day about four Scotchmen who went to a restaurant to eat and after some heated arguments as to who would be privileged to pay they decided to blindfold the waiter and the first one he touched agreed to pay. Needless to say they haven't found the Scotchman yet.

Doctor: "What you need, my dear young lady, is a little sun and air."
Patient: "Why doctor, how dare you. Why I'm not even married!"

Central Service Station

Having taken over the business formerly conducted by Granlin & Running I wish to assure the public that it will be continued on the lines of actual service rendered by the former proprietors. Everything that can be done for your convenience or comfort will continue to be the aim of the new management. Stocks of the best of everything in the lines of Oils, Gas, Accessories, etc., will be maintained up to the highest standards.
Your patronage solicited.

ROY LUCHIA

Miss Smith, of Vancouver who has been on a visit to her sister, during the latter's illness, has returned to her home, Mrs. Moffat being well on the way to complete recovery.

"30 Million Frenchmen can't be Wrong." See Maurice Chevalier at the theatre Sat. night in Innocents of Paris.

Ten ears of hogs have been shipped from this district recently. It would appear that considerable effort is being made to supplement straight wheat farming.

The Ladies' Aid will meet at the home of Mrs. P. O. Summers on Thursday, April 17th.

The two young sons of Mr. and Mrs. Chas. Motlock have made satisfactory recovery from pneumonia. Both were critically ill for a time.

NOTICE TO CREDITORS AND CLAIMANTS

IN THE ESTATE OF HERBERT WILLIAMS, late of Champion, Alberta, Farmer, Deceased:
NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of Herbert Williams, Deceased, who died on the 28th day of January, 1930, are required to send to the undersigned Executor of his will by the 30th day of June, 1930, a full statement, duly verified, of their claims and any securities held by them, and that after that date the Executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or brought to her knowledge.
DATED at Vulcan this 15th day of April, A.D. 1930.
L. H. STACK, Solicitor for MARY E. WILLIAMS, The Executrix.

Little Kenneth John Patterson, aged 14 years, five months and 18 days, died at his home 12 miles east of Barons on Friday, April 11, after an illness of six months. Little Jack suffered from several diseases—flu, rheumatic fever which resulted in heart trouble, and then dropsy set in. He was a patient little sufferer, never known to complain. He was the youngest child of Mr. and Mrs. Wm. Patterson.

Little Jack was laid to rest in the White Lake cemetery on Sunday afternoon at 3 o'clock. Mr. Hunt of Champion preached the funeral service.—Lethbridge Herald.

Pound Notice

The
DOMINION
ROYAL

The tire of today for the car of today has extra strength where strength is needed; design refinements to meet every crisis.

A sensation from their start in the summer of 1929, the Dominion Royals are now standard equipment on many of Canada's finest cars.

Put Dominion Royals on your car for safe and trouble-free driving this year . . . and next.

Dominion Royals are sold and serviced by Canada's greatest tire organization—the Dominion Tire Depot System—each independent unit distinguished by its blue and orange color scheme.
